ANALYSIS & FINDINGS

Pool Impact on Price/SqFt:

- All 16 properties have pools (baseline expectation in this neighborhood)
- Cannot determine pool premium â€” no non-pool comps available

Lake View Premium:

- 5128 Seascape (Pool/Lake): \$732/sqft sale price â€” HIGHEST in dataset
- 2209 Colonial (Pool/Golf): \$448/sqft â€” second highest
- Lake view adds approximately \$200-300/sqft premium over standard pool homes
- Golf course view also commands premium

Zestimate vs Sale Price Accuracy:

- Average Zestimate: \$1.73M
- Average Sale Price: \$1.71M
- Overall accuracy: Within 1% â€” Zillow very accurate in this neighborhood
- 7 of 14 sales: Within 5% of Zestimate
- 3 sales: 10-15% below Zestimate (buyer's market conditions)
- 2 sales: 10-15% above Zestimate (competitive bidding)
- Trend: Earlier in year (Mar-Jun) = closer to Zestimate; Later (Oct-Nov) = below Zestimate

Days on Market Analysis:

- Average DOM: 22 days (excluding -10 outlier)
- Median DOM: 2.5 days
- 10 of 15 properties: Sold in 0-7 days (very fast market)
- 2308 Misty Haven: 141 days on market BUT still sold above list price â€” suggests initial overpricing, not market weakness
- 2704 Coastline: -10 days = sold before official listing (pocket listing)
- Quick sales indicate: Strong demand, proper pricing, or both

Pricing Strategy Recommendations:

1. Price at or slightly below Zestimate for 0-7 day sale
2. Lake/golf views justify 20-30% premium over standard pool homes
3. Newer construction (2017) commands massive premium regardless of view
4. Expect longer DOM in fall/winter (Oct-Nov avg 65 days vs spring avg 3 days)
5. If DOM exceeds 30 days, consider 5-10% price reduction

Other Observations:

- Acreage does not strongly correlate with price/sqft in this dataset
- Year built matters: 2017 construction = \$732/sqft vs 1979-1986 avg = \$360/sqft
- Bedroom/bath count less important than total sqft and premium features
- Most homes sold at or below list price " suggests pricing discipline by sellers
